

Islamic World Journal Citation Reports (JCR)

Islamic World JCR is derived from international Scientometric standards and is an essential tool for in-depth analysis and ranking of scholarly and professional journals. This tool is designed in Persian, English, French and Arabic languages. By analyzing citations, Islamic World Journal Citation Reports measures research influence and impact at journal and category levels and shows the relationship between citing and cited journals. Exploring the impact and influence of the Islamic World's leading scholarly journals is possible by performing direct comparisons of titles using trend analyses.
